

- The MORE HEALTH website is equipped with a Classroom TEACHER section. Here you will find pre- and post-visit activities, vocabulary words, and in many cases pre-and post-visit videos.
- Visit morehealthinc.org https://www.morehealthinc.org/teachers/
- Password: resources

Pre-Visit Activities

- Review the enclosed vocabulary. Students do not need to have a working knowledge of the terms, rather a beginning familiarity.
- Click the link to play video: How the Heart Works (6:15 minutes)
 https://kidshealth.org/en/kids/csmovie.html?WT.ac=en-k-htbw-main-page-c
 If time permits, you can find additional activities and a quiz on the website.
- Read aloud: Your Circulatory System by Conrad J. Storad and/or Why do Bruises Change Color? by Angela Royster.
- Create a writing activity for your students having them use as many of the Vocabulary words
 as possible. You may want them to retrace where blood travels or what makes up their blood.
 Using these new words immediately after completing the video and book should make
 writing more accurate and interesting.
- For teacher reference, see enclosed Diagram of the Heart (page 6).

Suggested Post-Visit Activities

- Have students complete the Walk Through the Heart crossword puzzle-Answer Key (page 7)
- Distribute "Dear Parent" letter including the Heart Healthy Pledge to each student.
- Have entire fifth grade class work together to decorate a lunchroom bulletin board showing "Heart Healthy" foods and activities. They could use digital photos, magazine advertisements, newspaper clippings, etc.
- As homework or in groups, have students research possible snacks to determine which are
 the healthiest/unhealthiest snacks. (for groups, assign a snack item, i.e.: chips, crackers,
 yogurts, cheeses, etc.)
- Have your students research different illnesses/diseases that can cause distress to the heart. Their report can include the illness, whether it is genetic, environmental, or self-induced due to risky behaviors, and if there is a cure or treatment to help.

Vocabulary

• aorta_n the largest artery in the body responsible for carrying oxygen-rich blood

from the heart to all parts of the body

• arteries_n blood vessels that carry blood away from the heart

• atrium/atrian the two upper chambers of the heart that fill with the blood returning to the

heart from the body and lungs

• **blood**_n a liquid that circulates oxygen and nutrients in the body and helps remove

carbon dioxide from the cells

red blood cells carry oxygen and remove carbon dioxide from the body

white blood cells attack germs, like viruses and bacteria that make people sick

platelets smallest blood cells that form clots and control bleeding by sticking to each

other and the edges of an injury to form a plug

plasma the liquid part of the blood that transports the red blood cells, white blood

cells, and platelets; mostly water

• **blood bank**_n a place where blood and blood products are collected and stored for future

use or transfusion

• **blood vessels**_n network of tubes that carry blood through the body

• bone marrow_n the soft blood forming tissue that fills the cavities of the bones; acts as the

chemical manufacturing plant for cells of the body

• capillaries_n the smallest blood vessels

• carbon dioxiden a gas produced as a waste product in the body exhaled by the lungs

• **cells**_n tiny building blocks for all parts of the body

• **chambers**_n the four hollow spaces in the heart where the blood flows

• circulatory the body system comprised of the heart and blood vessels

system_n

• **heart**_n a muscular pump which sends blood throughout the body

• heartbeat_n the sound of the heart valves opening and closing

• **nutrition**_n the process by which an animal or plant takes in food and uses it in living and

growing

Lesson Sponsor

ullet oxygen_n a gas that is needed by cells in the body and is taken from the air by the lungs

• **pulse**_n rhythmic vibration in the arteries caused by the beat of the heart which can be

felt on the skin typically at the wrist or neck

• valves_n "doors" in the heart which ensures that blood flows properly in and out of

the heart

• **veins**_n blood vessels that return blood to the heart

• **vena cava**n the two largest veins in the body (superior and inferior) bringing waste-filled

blood from the body to the heart

• **ventricle**_n either of the two lower chambers of the heart that pumps blood into the

arteries

Goals

- Students will understand the structure and function of the heart and circulatory system.
- Students will understand their responsibility for their healthy heart.
- Students will understand the importance of blood donation in their community.

Objectives

- Students will be able to locate the heart and identify its four chambers.
- Students will be able to name the three types of blood vessels.
- Students will be able to define pulse, pump, muscle, and valve as they relate to the heart.
- Students will be able to name at least three components of blood and their functions.
- Students will be able to participate in the Walk-Through-The-Heart activity.
- Students will be able to name at least three ways to keep their heart healthy (e.g., nutrition, exercise, avoid alcohol, drugs, and cigarettes).

Standards

The student will	l
HE.5.B.3.3	compile resources from home, school, and community, technologies that
	provide valid health information. (suggested post-visit activity)
HE.5.B.5.1	describe circumstances that can help or hinder healthy decision making.
HE.5.B.5.2	summarize healthy options to health-related issues or problems.
HE.5.B.5.3	compare the potential short-term impact of each option on self and others when
	making a health-related decision.
HE.5.B.5.4	select a healthy option when making decisions for yourself and/or others.
HE.5.B.6.1	specify a personal health goal and track progress toward achievement.
HE.5.C.1.1	describe the relationship between healthy behaviors and personal health.
HE.5.C.1.3	explain ways a safe, healthy home and school environment promote personal
	health.
HE.5.C.1.4	compare ways to prevent common childhood injuries and health problems.
HE.5.C.1.5	explain how human body parts and organs work together in healthy body
	systems, including the endocrine and reproductive systems.
HE.5.C.2.2	predict how friends/peers may influence various health practices of children.
HE.5.C.2.3	predict how the school and community influence various health practices of
	children. (suggested post-visit activity)
HE.5.P.7.1	model responsible personal health behaviors.
HE.5.P.7.2	illustrate a variety of healthy practices and behaviors to maintain or improve
	personal health and reduce health risks. (suggested post-visit activity)
HE.5.P.8.1	persuade others to make positive health choices. (suggested post-visit activity)

SC.5.L.14.1	identify the organs in the human body and describe their functions, including
	the skin, brain, heart, lungs, stomach, liver, intestines, pancreas, muscles and
	skeleton, reproductive organs, kidneys, bladder, and sensory organs.
ELA.5.C.1.3	write to make a claim supporting a perspective with logical reasons, relevant
	evidence from sources, elaboration, and an organizational structure with varied
	transitions. (pre/post-visit activities)
ELA.5.C.1.4	write expository texts about a topic using multiple sources and including an
	organizational structure, relevant elaboration, and varied transitions.
	(pre/post-visit activities)
ELA.5.C.2.1	present information orally, in a logical sequence, using nonverbal cues,
	appropriate volume, clear pronunciation, and appropriate pacing.
	(pre/post-visit activities)
ELA.5.C.3.1	follow the rules of standard English grammar, punctuation, capitalization, and
	spelling appropriate to grade level. (pre/post-visit activities)
ELA.5.C.4.1	conduct research to answer a question, organizing information about the topic and using multiple reliable and valid sources. (<i>pre/post-visit activities</i>)
ELA.5.V.1.1	use grade-level academic vocabulary appropriately in speaking and writing.
PE.5.L.3.1	identify a moderate physical activity.
PE.5.L.3.2	identify a vigorous physical activity.
PE.5.L.3.3	identify opportunities for involvement in physical activities during the school
	day.
PE.5.L.3.4	identify opportunities for involvement in physical activities after the school day.
PE.5.L.3.5	formulate a plan to increase the amount of time spent in physical activity.
PE.5.L.3.6	discuss lifestyle behaviors that can be made to increase physical activity.
PE.5.L.4.2	identify activities that develop and maintain each component of physical fitness.
PE.5.L.4.3	identify that an increase in heart rate intensity is necessary to enhance
	cardiorespiratory endurance.
PE.5.L.4.6	plan a menu for a balanced meal.
PE.5.R.6.2	explain the benefits of physical activity
